

Gregory C. Evans

I. Profile:

A technology professional with 16 years of experience designing, developing and implementing PC-based database applications. Extensive experience managing development teams engaged in creating commercial database applications for large government agencies. Currently applying database, programming and general information system experience and knowledge in the field of computer forensics. Experience in deposition and trial testimony.

II. Experience:

Great Scott Enterprises, Inc.

Senior International Computer Forensic Examiner

July 2005 to present

Job Responsibilities:

Collection, preservation, examination and reporting of Computer forensic evidence for Civil as well as Criminal investigations. Providing analysis, support and expert witness testimony for both Plaintiffs and Defendants nationwide and internationally.

NTI Breakwater

Computer Forensics Specialist

October 2002- July 2005

Job Responsibilities:

My primary responsibility is conducting computer forensics investigations, specializing in cases involving databases. Additionally, I oversee the Electronic Data Discovery department at NTI. During my tenure at NTI I have written two database applications for internal use by NTI staff. The first application was a Customer Resource Management (CRM) application utilized by NTI's Sales department. The second application was the Evidence Management & Tracking System in use by the NTI consulting group.

JusticeTrax Inc.

Vice President of Product Development

Co-Founder & Shareholder

May 1997 – October 2002

Job Responsibilities:

My primary responsibility was the overall management of commercial software development projects. The largest development project I managed was the LIMS-Plus® laboratory case management application. This database application is utilized by criminal forensic laboratories in order to facilitate the automation of work flow and information processing. I was also responsible for managing the design and development of the PathAssist™ product. This was another database application designed as a case management tool for use by medical examiners and coroners.

JusticeTrax applications are installed in scores of Federal and state-level laboratories across North America. A partial list of current contracts includes:

Arizona State Police
California Department of Justice
Canadian Intelligence Service
Federal Bureau of Investigation
Georgia Bureau of Investigation
Montana State Police
